All Bidders will be asked for product features demonstration. Product demonstration carries separate weightage.

Hardware and Software requirements

The bidder shall have to provide the hardware and any other middle ware required for functioning of the system. Complete Bill of Material to be provided in the technical proposal. Bank may decide to procure hardware and system software from the selected bidder or may go through separate procurement procedure.

- The Bidder is required to size for adequate hardware based on the volumes for the Solution covering the integrated HRMS solution
- The software should be provided in proprietary model. Bank can request for change request unlimited times as per the Bank's requirement anytime during the project duration.
- System should be sized to ensure that HRMS data relating to employees master information transfer and promotions will be retained forever. The other data will be retained on-line for a period of 10 years, beginning from the previous 9 years and ending with the current year. All the data previous to the 9 years will be indexed archived and will be retained offline. The Bidder is required to provide appropriate interface for quick retrieval of data from the archives as and when required without any intervention by the bidder once the system goes live. Data archival must be an automated process based

- on certain business rules which will be shared with the successful bidder and data retrieval system needs to be user friendly on demand system without the intervention of the Bidder once the system is online.
- The hardware technology proposed for the Solution should be of enterprise class, best of the breed, latest, tested and stable release of OEM vendor and based on the latest platform enabling technology.
- The vertical scalability available within the server hardware proposed for the Solution should be at least minimum 20% to accommodate additional CPUs, Memory (including cache) over and above the terminal year sizing requirements.
- The Bidder needs to size, design, procure, commission and maintain the hardware and related software for all the applications for the period of contract required as per the RFP.
- The hardware proposed has to be sized as per the below concurrency requirements

#	Area	Factor	Minimum sizing and support
1	Concurrenc y	Average Concurrency	20% of total users at any point of time
		Peak Concurrency	30% of total users at any point of time
2	Report	Standard report generation	50 reports per hour
	generation	Ad hoc report generation	20 reports per hour
		Salary slip generation and printing	500 reports per hour

Note: The Bidder has to size the solution for peak periods of concurrency and report generation

- The design should be such that the minimum availability requirements as specified in the SLA section of the tender are met. The integrated HRMS Application should be designed for Active-Passive and the Database should be sized for Active-Passive cluster based on the proposed HRMS application design.
- The Bidder is expected to size Hardware for the Solution based on the information provided in the section 3 About the Bank of this RFP for implementing the solution for the employees. The sizing should be scalable to support the terminal year requirements of branches and employees over the tenure of the Contract. At any point in time during the contract period, for these locations, the utilization levels of following should not exceed beyond the limits mentioned below.

Processor – 40% to 45% Memory/RAM – 50% to 60% Hard Disk/Storage - 60 % to 70 %

• In case the above requirement is not met, additional hardware and related software would have to be provided by the Bidder at no further cost, within two weeks of crossing the threshold(s).

 The hardware sized should be scalable and fault tolerant. All the components within the server should be hot swappable or pluggable and should incur no downtime due to component failure.

Note: The Bidder is responsible to arrive at the sizing independently. The Bank is not responsible for any assumption made by the Bidder with respect to the sizing. In the event the sizing quoted by the Bidder does not meet the performance / service levels of the Bank the Bidder will at their cost carry out the necessary upgrades / replacements. The Bank will not pay any additional amount during the period of the contract

Software Licenses

The Bidder has to ensure that all necessary licenses that are required for this RFP are procured and installed at the DC and DRC and other relevant locations of the Bank. The Bank will not be responsible or liable for any infringements or unauthorized use of the licensed products. In the event of any claims against the Bank for any license related issues, the Bidder will have to act upon the same and all liabilities and claims whatsoever will have to be settled by the Bidder.

Further if the Bidder has missed out providing any licenses to the Bank, then the Bank will not bear any additional amount for procurement of such licenses at a later date. Bidder is required to consider the ATS of the Solution and related application software for the period of contract from day one. The Bidder is required to provide perpetual license in nature for all modules of the Integrated HRMS solution.

Import/Export Data

- Odisha Gramya Bank will provide data in the specified format for legacy data
 - Extract data in various formats.
 - Import and Export to the archived files.
 - Produce reports on all areas of data that can be exported to standard office suites.
 - Facilitate the cut-copy-paste function from the application to standard office suites.

The proposed system(s) must support a comprehensive access and authorization mechanism, including:

- Single sign-on for all system components
- Support for a central authentication scheme
- Ability to define multiple level authorities, comprehensive set of user roles and permission lists, and flexible segmentation of data
- Ability to manage access to authorized functions based on the roles represented in the account
- Ability to manage access to different segments of data depending on the role
- Ability to enter, view and access data through Mobile Devices /Tab

Implementation, Testing of Application in Head Office:

The application would be tested and implemented at the Head Office located in Bhubaneswar. However the application would be accessed by all users over the web. The testing of the application should be done in terms of Performance (load), Security and functional testing. All test reports need to be submitted to the department. The security of the application should be taken special care so that there should not be any hacking or intrusion

from any unauthorized person. For this purpose the application provider would have to perform the security test through any government authorized Cert-in agency. The delivery of the Hardware and implementation of software should be completed within 90 days from the date of acceptance of Purchase order.

Warranty and AMC

The contract with the final selected bidder will include a Two year warranty and 3 Years Comprehensive AMC of the system for a period of five years on completion of warranty period providing for changes/ updation that would be required for the system due to policy changes, new product launches. Bidders to provide all updates and upgrades at no extra charges during the contract period. Support for the proposed solution should be available throughout the contract period.

Warranty Support:

The Agency/Firm/Company should provide warranty support for 24 months from the date of "Go live". This support period will include all bug fixes and software upgrades. It should provide 60 months of support on-site as well as remote support. The service window for onsite support is for 12 hours (from 8 am to 8 pm) on all working days. On holidays there should be remote and on-phone support available. The selected tendering Firm/Agency/Company shall also provide the name and mobile number of a key person, who can be contacted at any time, even beyond the office hours and on holidays. The person should be capable to understand the software and their troubleshooting and making arrangement for taking appropriate measures for restoring/resume the software services at the earliest to Odisha Gramya Bank, Bhubaneswar. All the service conditions as applicable for Warranty period should be same during the comprehensive AMC period. Any fault with the Hardware or software need to be replaced within a stipulated time period as mentioned in SLA.

Annual Maintenance Support:

After the application goes live and all trainings are undertaken the vendor is required to provide project support to support the application, IT infrastructure and training. For that purpose a toll free number manned by support personnel needs to be operated on all office days through office working hours. The toll free number should be operational from the date of go-live till the end of project support period. As per the requirement the vendor should take care of all application related issues and arrange to support on the hardware and networking related components from the principal vendor. For this purpose at least one full time support executive with knowledge of application support and Infrastructure support should be deployed at Head Office during all office working days and office working hours. The vendor should also be ready to provide any onsite support as per requirement. Application support would cover any issues related to product support which included release updates, bug support, database support, patch updates etc.
